Actian Avalanche Connector QuickStart

Connector QuickStart includes:

Pre-built, customizable DataConnect integration templates to access and sync your preferred SaaS app data with Actian Avalanche

Provides fully customizable and sophisticated hybrid data integration capabilities that can scale and perform in the most demanding environments

Get started quickly with introductory training on data integration techniques

Leverage best practices and planning

QuickStart Goals

The QuickStart is a 5 day engagement to enable customers to:

Provision an Actian DataConnect environment

Set up connectivity endpoints to your SaaS apps

Deploy and schedule reoccurring integrations to continuously sync your SaaS app data

Overview

The Actian Avalanche Connector QuickStart package offers a pre-defined set of professional services, tailored to your requirements. The package is designed to help you access data from your preferred SaaS apps including Salesforce, NetSuite, ServiceNow & Workday and load it into Actian Avalanche quickly and efficiently.

Get peace of mind knowing that experts at Actian will manage the environment so that you can focus on growing your business.

Deliverables

1. Kickoff
   - Review and confirm a joint agenda for the engagement
   - Review source SaaS applications and source data objects for Actian Avalanche sync

2. Provision an Actian DataConnect Environment
   - Provision an Actian DataConnect environment and install SaaS integration templates

3. Set up Connectivity
   - Assist with establishing connectivity to specific SaaS endpoints
   - Assist with updating maps and schemas for customized objects
   - Test data sync from source SaaS apps to targets

4. Package, Deploy, Schedule Integration Packages
   - Deploy and schedule SaaS app integration packages to sync new and updated SaaS data

Data sheet

Training Workshop (2 days)

- Provide preliminary training on:
- Introduction to integration mapping techniques
- Automating and managing your integration design
- Perform basic administration and troubleshooting
- Applying integration best practices
- Connectivity

Optional Next Steps

Based on the knowledge gleaned from the engagement, we can also assist you with additional data integration or data preparation needs.
