| Notes: Actian supports and embraces the use of virtualized and fenced environments.   |                           |                |         |  |  |           |     |
| After Actian Corporation certifies a product on the high level version of an operating system, we assume that subsequent minor point releases of the operating system will also run successfully in the environment, as long as they contain no significant architectural changes. Only the latest GA release of a product will be re-certified to run on a new major release of an operating system. |                           |                |         |  |  |           |     |
