

## Heartbleed and Actian Products: Don't Worry.

Information security is of utmost priority to Actian and with the recent Heartbleed vulnerability we have been working quickly to determine the impact on not only our products but our support infrastructure. While we do ship OpenSSL within a few of our products our research has shown that we are running a version level in our platform that is not exposed as a service “- **because of this we believe the Actian Products are not vulnerable to Heartbleed.**”

We have also confirmed the vulnerability was not a threat to customer’s credentials or data using any of our core supporting infrastructures including; <http://supportservices.actian.com>, <http://esd.actian.com>, <http://community.actian.com> and <https://support.actian.com>.

If you have any questions and/or concerns please feel free to contact us at [products@actian.com](mailto:products@actian.com).

Sincerely,  
The Actian Product and Support Team
